ALUMINIUM
Aluminium extrusions in aggressive environments, 608
Aluminium extrusions: a flexible approach to construction, 101
Making light of automobiles, 666
Thin film technology to protect aluminium, 612

AUTOMOTIVE MATERIALS
Adhesives in the automotive industry, 659
Making light of automobiles, 666
Metal matrix composites, 17
Polyurethane, 79, 485
Where titanium fits in automotion, 662

CERAMICS
Blended high alumina cements, 103
Ceramic matrix composites for aero-engines, 16
High strength concrete: an economic solution, 98
Improving energy efficiency in firing of ceramics, 446
Surface engineering of ceramics, 340
Microwave processing of ceramics (the potential of), 152

COMPOSITES
Acoustic emission: assessing damage in composite materials, 453
Ceramic matrix composites for aero-engines, 16
Fracture of polymers and composites, 272
Gaining advantage from composites, 32
Metal matrix composites on the road, 17
Nanocomposite materials, 27
Reactive processing of polymers and composites, 156
Reinforcing fibres: the strength behind composites, 22
Polymer composites in the offshore industry, 13

CONFERENCE REPORTS
ATS 92, 169
4th European electric steel congress, 35
Griffith Centenary Meeting, 403
ICCM-9, 568
Plastics on the road, 110
Steel 91, 109
Superplastic forming discussion meeting, 502

CONSTRUCTION
Aluminium extrusions: a flexible approach to construction, 101
Blended high alumina cements, 103
High strength concrete: an economic solution, 98
Plastics and rubbers in building, 95
Strip steels: versatility in building and construction, 92
Structural steel design awards 92, 85
Titanium proves cost effective for corrosion free construction, 80

CORROSION
Copper based alloys: making inroads offshore, 233
Corrosion resistant GRP composites in pollution control, 232
In-service inspection and corrosion monitoring, 610
Rubber lining for corrosion protection in the process industries, 216
Stainless steels for harsh environments, 220
Thin film technology to protect aluminium, 612
Titanium, 80, 229

ENERGY EFFICIENCY
Controlling the cost of energy (the Energy Efficiency Office), 564
Cutting costs and saving energy with electricity, 566
Improving energy efficiency in firing of ceramics, 446
New design gas furnace saves 50% energy, 565
1992 PEP Awards

EXHIBITION PREVIEWS
EMAG 93, 519
Inspex 93, 309
Interceramex, 590
Interplas, 585
PVC 93

FINANCE
Making use of venture capital, 108

FIRE SAFETY
Fire, materials, mechanisms and measurements, 88

MANUFACTURING
Rapid prototyping and tooling technologies, 656
Production planning and control in the metals industry, 166

MATERIAL MATTERS
Ageing, serendipity and extinction, 299
An obsession with nails, 629
Engineers in fiction, 629
Eureka: the institute of materials and energy, 581
From airships to Buckyballs, 414
Nuclear's Maxwell demon, 245
Serrà, Serrà, 112
The philosopher and the science writers, 513

MICROSCOPY & ANALYSIS
Atomic absorption spectroscopy (lowering the detection limits in), 397
Atomic force microscopy: a tool for analysing coatings, 393
Characterising polymer surfaces, 497
Imaging soft and delicate materials, 616
Revealing magnetic microstructures, 670
Microtexture analysis: an indepth approach to materials, 390
Microstructural analysis, 496
Optical microscopy, 402,
Raman microscope: reveals molecular information , 8

MOULDING
Metal spraying of plastics moulds, 555
Polyurethane moulding process saves weight, 78
Powder injection moulding, 552
Powder metallurgy, 439

POLYMERS
Characterising polymer surfaces, 497
Conducting polymers for printed circuit boards, 607
Fracture of polymers and composites, 272
Liquid crystalline polymers, 488
Metal and polymer combinations in surface engineering, 335
Metal spraying of plastics moulds, 555
Microcellular elastomer improves suspension performance, 11
Polyurethane elastomers: durable and versatile polymers, 225
Polymer composites in the offshore industry, 13
Reactive processing of polymers and composites, 156
Rubber lining for corrosion protection in the process industries, 216

PROCESSING
Automated inspection techniques in materials processing, 276
Microwave processing of ceramics (the potential of), 152
Plasma arcs in materials processing technology, 443
Reactive processing of polymers and composites, 156
Unbalanced magnetron sputtering (novel materials by), 161
Production planning and control in the metals industry, 166

PRODUCT FOCUS
Analytical equipment, 689
Bonding and joining technology, 305
Ceramic processing, 371
High temperature and specialist heat treatment, 55
Materials databases, 419
Mechanical testing, 185
Microscopy and image analysis, 128
Nondestructive testing, 634
Plastics and rubber processing, 468
Temperature monitoring and control, 249
Thermal processing, 523

PROFILES
AEA invests in materials for the future, 106
Nippon Steel's pursuit of the ultimate, 624
The Biogel story, 680

SMART MATERIALS
What are smart materials anyway?, 449
Smart experts visit the States, 451

STEELS
Stainless steels for harsh environments, 220
Strip steels: versatility in building and construction, 92
Structural steel design awards 92, 85

SURFACE ENGINEERING
How to deposit DLC successfully, 347
Metal and polymer combinations in surface engineering, 335
Pulsed laser deposition of advanced materials, 344
Surface engineering of ceramics, 340
Thermal spray technology, 351

TESTING
Acoustic emission: assessing damage in composite materials, 453
Advances in nondestructive testing technology, 497
Automated inspection techniques in materials processing, 276
High speed fracture testing, 454
Image processing boosts inspection techniques, 402
Characterising machined surfaces using image processing, 492
Ergonomic materials testing system, 271
Fracture of polymers and composites into 21st century, 272
In-service inspection and corrosion monitoring, 610
Inspecting antique objects by radiography, 285
Non-contacting extensometry eases strain measurement, 557
The restoration of Eros, 668
Wear metrology: the art of determining a material's performance, 281

THERMAL PROCESSING
Total quality in heat treatment, 671
Transformations in heat treatment, 613
Metallurgical benefits of ultra rapid heat treatment, 441

TITANIUM
Titanium: high performance under hostile conditions, 229
Titanium proves cost effective for corrosion-free construction, 80
Where titanium fits in automotion, 662

VIEWPOINT
Sir Colin Chandler: the business of engineering, 499

Materials

205 Adhesives
210 Advanced composites
230 Engineering ceramics
233 Engineering elastomers
235 Engineering polymers
240 Heat resistant materials
242 Nickel coated materials
245 Nickel base alloys
246 Polymer matrix composites
247 Precious metals
251 Refractory ceramics
255 Reinforcing fibres
266 Steels: carbon
267 Steels: duplex
270 Steels: high alloy
272 Steels: low alloy
274 Steels: stainless
285 Masterbatch: additive
286 Masterbatch: black
287 Masterbatch: colour
288 Masterbatch: flame retardants
289 Masterbatch for recycling
295 Thermoplastics: mineral filled
296 Thermoplastics: conductive compounds

Testing, Inspection and Analysis

300 ACPD testing
301 Adhesive bond testing
302 Automatic quality testing
303 Composites testing
304 Creep and stress rupture testing
305 Eddy current testing
306 Elevated temperature testing
308 Environmental exposure testing
309 Extensometers
310 Fatigue testing
312 Failure analysis
316 Film thickness measurement
317 Flexure testing
318 Fracture toughness testing
319 Gas pressure testing
320 Hardness testing
322 Image archiving systems
325 Impact testing
327 Infrared linescanning systems
328 Magnetic flux leakage testing
330 Magnetic particle inspection
332 Microhardness testing
333 Materials characterisation
334 Materials analysis
341 Non-contact temperature measuring systems
342 Particle size analysers
363 Thermal mechanical simulation machines
373 Video products
375 X-ray inspection
376 Calibration sources: temperature
397 DCPD testing
398 Corrosion testing
399 Crack growth monitoring
335 NDT equipment
340 Non contact gauging and measuring systems
343 Permeation testing
344 Sealants testing
345 SPC systems and equipment
336 Service calibration of testing machinery
341 Non-contact temperature measuring systems
346 Spectrophotometers, AA
347 Spectrometers, ICP
348 Spectrometers, Optical emission
349 Spectrometers, XRF
350 Spectroscopes
352 Spring testing
354 Stress corrosion testing
355 Surface analysis
357 Surface area analysers
360 Tensile/compression testing
362 Thermal analysis
364 Thermal imaging equipment
365 Thickness measurement
370 Ultrasonic testing
380 Capillary rheometers
381 Curemeters
382 Data acquisition and analysis systems
383 Mooney viscometers
384 Radiation thermometers

Microscopy

400 Electron microscopes
401 Confocal scanning microscopes
405 Image analysis
407 Lapping and polishing equipment
408 Chemical and chemo-mechanical polishing equipment
410 Measuring microscopes
415 Metallographic consumables
420 Metallographic preparation equipment
422 Metallographic services
425 Optical microscopes
426 Precision diamond saws
430 Stereo microscopes
431 Autocollimators
432 Interferometers
435 X-ray analysis

Surface Treatment

500 Case hardening
505 Chemical vapour deposition
515 Hard surfacing
522 Nitriding: plasma/gas
523 Nitrocarburising

Thermal Processing

600 Burners
603 Continuous furnaces
604 Contract furnace brazing
605 Contract heat treatment
606 Carbon fibre insulation
610 Controlled atmosphere furnaces
611 Convection ovens
612 Crucible furnaces
615 Electric furnaces
622 Forced air circulation ovens
625 Furnace furniture/fixtures/insulation
635 Gas fired furnaces
640 Heat treatment furnaces
645 Holding furnaces
650 Induction furnaces
660 Laboratory furnaces
665 Melting furnaces
668 Oil fired furnaces
670 Process control equipment
675 Refractory products
678 Sinter HIP furnaces
685 Vacuum heat treatment furnaces
686 Vacuum heat treatment services
690 Vacuum melting furnaces
695 Vacuum sintering furnaces

Production and Processing Equipment

700 Brazing/metal joining
703 Casting
705 Continuous casting
708 Diffusion bonding
709 Electron beam welding
710 Extrusion
725 Hot isostatic pressing
727 Hydraulic presses
745 Powder production
760 Grinding mills
761 Mechanical presses
762 Pressure castings
763 Tape castings
790 Vacuum hot pressing

Miscellaneous

800 Materials databases
801 Materials selection advice
820 Training/technical courses
900 IoM membership
910 IoM publications
920 IoM conferences
930 Subscribing to *Materials World*
